THE SPECIALIST IN LED VEHICLE LIGHTING

As European importer and manufacturer of exclusively LED vehicle lighting, TRALERT® distinguishes itself through a complete and high-quality product range, excellent service and expert technical support.

Due to our expertise and focus, we have quickly become one of the largest suppliers in our industry. Besides representing several renowned brands and manufacturers in the European market, TRALERT® also manufactures lighting products in-house. TRALERT® is also your partner in providing customised solutions for all your lighting needs, whether for individual lighting or fully customised configuration of cable sets and total solutions.

With our own TRALERT® marketing team, we are perfectly capable of supporting you in the area of customised brochures, full shop-in-shop support and the delivery of customised Social Media content.

TRALERT®, your partner and innovative specialist in (LED) vehicle lighting.

MISSION OF OZZ

OZZ's mission is to revolutionize the LED driving lights market through innovation and design. With a shared purpose and collaboration among companies, OZZ strives to set a new standard, pushing the boundaries of features and designs. By prioritizing customer satisfaction and creating lasting impact, OZZ is committed to becoming a leader in the LED driving lights industry.

We at TRALERT® believe in the stated mission of OZZ and recognize the unique value of the lighting from the OZZ line. Prioritizing customer satisfaction is also a value that TRALERT® strongly embraces.

VISION OF OZZ

OZZ envisions a future where the LED driving lights market is transformed by innovation and design. As a collective brand, OZZ strives to provide premium-performing products that stand out from generic offerings.

TRALERT® shares this vision and aims to provide high-quality products and excellent service.

With a shared purpose and collaboration, OZZ aims to deliver cutting-edge features and design. By pushing boundaries and prioritizing customer satisfaction, OZZ seeks to make a lasting impact in the market for LED driving lights.

THE PERFECT LED DRIVING LIGHT

The new TRALERT® OZZ Series is a top-of-the-line LED driving light. In addition to the duo-color daytime running lights with dynamic start-up, the OZZ Series is characterized by a very powerful high beam.

Another distinctive element of the OZZ Series LED driving light is the choice of housing color. In addition to the usual black housing, you can also opt for a variant with a white housing. Especially on (partially) white trucks, this provides a unique upgrade in terms of looks.

DYNAMIC START-UP

The standout feature on the OZZ LED driving lights is the dynamic start-up. A stunning dynamic effect becomes visible as soon as you activate the daytime running lights of the LED driving light. In the automotive industry, this is already a popular feature incorporated by many premium brands in the headlights of their models. This feature has now been introduced to the truck world through this lamp.

The OZZ Series takes it even further: the dynamic start-up works in both colors of daytime running lights. Whether you opt for white daytime running lights or amber daytime running lights, with these driving lights, you're sure to steal the show.

DRIVING LIGHTS WITH DUO-COLOUR DAYTIME RUNNING LIGHTS

OZZ XR2

Unique features in a popular format: that characterizes the OZZ XR2 driving lights from TRALERT®. These LED driving lights are available in two sizes: 9" and 7". The standout feature is the horizontal stripe with duo-color daytime running lights. With amber and white daytime running lights to enhance the appearance of your truck. Need more light? Activate the powerful driving beam. All features of these driving lights are, of course, fully certified, allowing you to hit the road with confidence.

SCANIA

ABOUT THE OZZ XR2 P9"

Upgrade your truck or 4x4 with the TRALERT[®] OZZ XR2 P9" LED spotlight and give it a complete look. The powerful LEDs deliver an impressive light output of 15,000 lumens. Discover the unique features of the OZZ, including duo-color daytime running lights and the striking dynamic start-up, a visual highlight for this model.

Personalize your vehicle with the OZZ XR2 P9", available in two variants. Choose between the black housing (Art. 88101) and the white housing (Art. 88102) to perfectly match the spotlight with the look of your vehicle. Make a conscious choice for style and functionality with the OZZ XR2 P9" LED spotlight.

ABOUT THE OZZ XR2 P7"

The OZZ XR2 P7" is the smaller version of the TRALERT® OZZ XR2 P9" LED spotlights. This new LED spotlight with a diameter of 178mm is equipped with powerful LEDs producing a light output of 7,200 lumens. Additionally, the OZZ XR2 P7" features duo-color daytime running lights. Unique to the OZZ series is the dynamic start-up, a beautiful visual addition to this model. This feature is also present in this smaller version.

The OZZ XR2 P7" is available with a robust black housing (Art. 88103) and with a white housing (Art. 88104) made of lightweight aluminum. The lens is made of polycarbonate. Thanks to this choice of materials, the OZZ XR2 P7" is suitable for delivering maximum performance under all conditions.

SUPERIOR BUILD QUALITY

The innovative OZZ LED light bars are designed to provide a superior lighting solution. These innovative LED light bars have startup diodes, creating a visual effect during ignition. The slim design adds a modern aesthetic to your vehicle. This dynamic start-up is present in both the LED light bars with daytime running lights and the LED light bars without daytime running lights.

The OZZ LED light bars are highly powerful, delivering even 1 lux at a distance of up to 590 meters. Additionally, the light has a neutral color temperature of 5000K, ensuring it provides an excellent lighting solution in all conditions

OZZ LED BARS: THE **RIGHT CHOICE**

The TRALERT® OZZ LED light bars are the perfect way to add extra light and style to your vehicle. With four different LED light bars to choose from, it's easy to find the perfect light bar for your car or truck. This allows you to fully customize the appearance of your vehicle according to your preferences.

The TRALERT® OZZ LED light bars come standard with a 100cm connection cable with Deutsch connector for easy installation. Moreover, the LED light bars are CE, R10, R148, R149, and IP69K certified.

OZZ XB1 P

The OZZ XB1 P stands out as a unique and innovative LED light bar. With its distinctive features, this LED light bar elevates the standard to a new level. This LED light bar is available in a 9" and a 20" variant. These two variants with a P in the title feature duo-color daytime running lights in amber and white, which glow together with the rest of the LEDs during the dynamic start-up. Further details on the specifications of the lights will be discussed on the following pages.

ABOUT THE OZZ XB1 P20"

The OZZ XB1 P20" is the perfect LED light bar to add to your vehicle. Whether you're venturing into the wilderness or simply looking for an upgrade for your vehicle, the OZZ XB1 P20" offers the perfect combination of innovation and aesthetics. Add a touch of uniqueness to your driving experience with this distinctive OZZ LED light bar, featuring duo-color daytime running lights and dynamic start-up.

Looking for an LED light bar that complements your vehicle well, perhaps mounted under the license plate? Then the OZZ XB1 P20" is a good choice. This LED light bar has a light range of 590m at 1 lux. Additionally, it features 14 Osram LEDs and has a light output of up to 11,200 lumens.

OZZ XB1

In addition to the XB1 P, there is also the XB1. These LED light bars do not feature DUO-color daytime running lights, but they are certainly a unique and powerful LED light bar. Despite the absence of daytime running lights, this LED light bar does have a unique dynamic start-up. This LED light bar is also available in a 9" and a 20" variant. Choose the LED light bar that suits you best and elevate your vehicle to the next level with the perfect balance between safety and design.

ABOUT THE OZZ XB1 20"

Experience the power of the TRALERT® OZZ XB1 20" LED light bar and illuminate the road like never before. With an unparalleled light output of 11,200 lumens, this LED light bar not only provides exceptional brightness but also ensures a safe and eye-catching driving experience. Whether you're heading for off-road adventures or dominating the highway, the OZZ XB1 20" guarantees reliable performance in every situation.

Thanks to its sleek design and advanced technologies, you not only benefit from optimal illumination but also add a stylish dimension to your vehicle. With the OZZ XB1 20" LED light bar, you are assured of durability, efficiency, and an upgrade that exceeds expectations.

LEGEND

E

"E keur" is a seal of approval that shows that your vehicle or product complies with EC directives. EC guidelines can be understood as European Union legislation.

CE

The CE mark is a Europe-wide agreement on the safety of products in the EU, which is subject to many rules. For LED vehicle lighting, CE marking is mandatory.

IP69K

IP stands for 'International Protection Rating' and indicates whether a product is dust- and water-proof. IP69K means completely dust-proof, waterproof, moisture-proof and high-pressure spray-proof.

R10

EMC ECE-R10 is a type of approval for electrical systems on vehicles and means that the lighting does not interfere with other electrical equipment.

R65

ECE-R65 is the European directive that establishes requirements for optical signals for vehicles and trailers. It is a certification for signaling lights such as flashers and beacons.

R148

ECE-R148 is an overarching new regulation and follows R7, among others. ECE-R148-certified lights may be officially operated as daytime running lights when fitted and connected correctly.

R149

ECE-R149 is an overarching new regulation and follows R112, among others. ECE-R149-certified lights may be officially operated as main beams when fitted and connected correctly.

3Y

3Y stands for a three-year warranty on internal components. In case of a technical defect in the lamp within the warranty period, you will receive a working new one.
