

LED INTERIOR LIGHTING TRALERT® BROCHURE

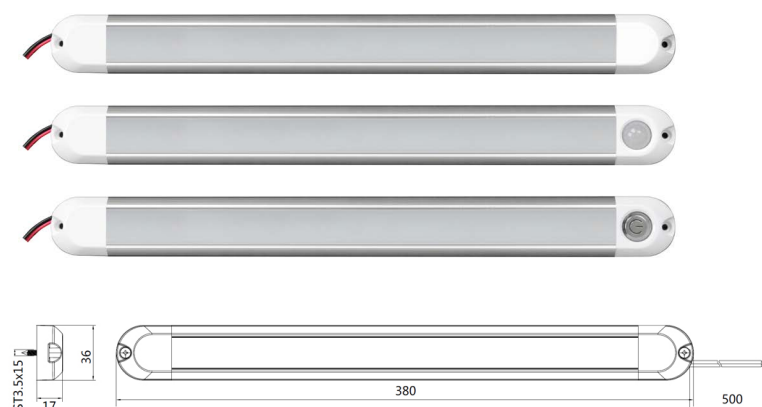

LED interior lights for professionals

B-2000 SERIES

Meet the B-2000 series LED interior lighting. This series of LED strips for your interior consists of nine products. There is a choice of three different lengths and three types of switches: with motion sensor, with touch switch and without switch. All products in this series have the same slimline design with a thickness of only 17mm, allowing it to blend nicely into your interior. Great for your company van, closed trailer or trailer, among others.

Find out which variant best suits your vehicle on the following pages.

The B-2038 series interior lighting is the shortest variant of the B-2000 series interior LED strips. These strips are 380mm long and deliver a light output of 750 lumens. With a light colour of 6500K, this lamp delivers neutral light similar to natural daylight. This bright colour increases concentration and performance in the room making this very suitable for the interior of your commercial vehicle.

The B-2038 series consists of three variants: without switch (BG-2038), with motion sensor (BS-2038) and with touch switch (BT-2038). This allows you to choose the variant that best suits your lighting needs.

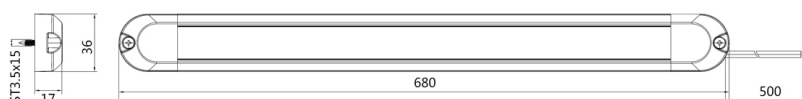

Certificates & warranty:

B-2038 series product specifications:

Connection:	50cm cable	Mounting:	Surface mounting
Voltage:	12-24V	Dimensions:	380 x 36 x 17mm
Wattage:	8W	Housing color:	light grey
Light color:	6500K	Certificates:	E, CE, ECE-R10
Lumens:	750 lumens	Warranty:	3 years
IP-value:	IP67

The Click-&-Go LED Strip on roll has a standard length of 5 metres, but the LED strip can be cut every 5cm. This makes it possible to tailor the strip exactly to the interior of your vehicle. Markings for this can be found on the print. If required, the LED strip can also be ordered in rolls of 50 metres.

The LEDs are concealed in a silicone layer, making the strip IP68 waterproof. This interior lighting is available in 12V or 24V and with neutral white light (4000K) or cold white light (6000K). Also available are several click connectors to connect pieces together and aluminium profiles to mount the strips nicely.

Certificates & warranty:

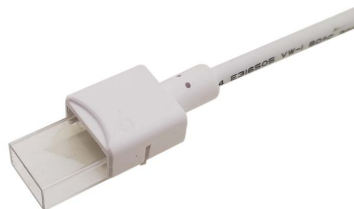

Click-&-Go LED strip product specifications:

Connection:	10cm cable	Mounting:	3M adhesive tape
Voltage:	12V or 24V	Dimensions:	5000 x 10 x 5mm
Wattage:	12W per metre	Housing color:	White / transparent
Light color:	4000K or 6000K	Certificates:	E, CE
Lumens:	1200 lumens per metre	Warranty:	3 years
IP-value:	IP68
