

TRALERT® LEAFLET
MV-7100 SERIE LED TOP LAMPS

Added to the TRALERT® marking lighting range earlier this year: the MV-7100 series of LED top lamps. Designed specifically for Volvo trucks, these top lights are available in amber (art. MV-7100A) or white (art. MV-7100W).

These top lights have a 15cm cable and come with handy mounting tubes. In this case, the mounting rubbers are flat for straight mounting. This makes them seamless to mount on the cab of your Volvo truck. This makes the MV-7100 series of top lights the ideal contour light to complete your Volvo truck’s lighting package.

Certificates & warranty:

- E
- CE
- IP67
- 2Y

Included as standard:

- 15 cm cable with open wire end
- Mounting rubber
- Other mounting accessories

After the variant with straight mounting base, now also new within TRALERT®: the MV-7100 series of LED top lights with angled mounting base. These top lights have been specially developed for Volvo trucks and are available in amber (Art. MV-7101A & MV-7102A) or white (Art. MV-7101W & MV-7102W).

These top lights feature a 15cm cable and come with handy mounting tubes. The products on this page come with a sloping mounting base. This is suitable for mounting on the corners of the cabin.

Certificates & warranty:

- E
- CE
- IP67
- 2Y
