OZZ WB1

88504

Before installation

- 1. Check the local laws and regulations for LED light bars in your area and any regions your vehicle may travel to before installation to ensure compliance.
- 2. Read all installation instructions thoroughly.
- 3. Ensure the dimensions and weight of the lamps and devices are suitable for your vehicle; see Figure O1 for reference.
- 4. Slight moisture inside the light bar may be present initially but will dissipate through the vent after 2-4 uses.
- 5. Operating Voltage: 10-32V DC.

Mounting

- 1. Drill 8.5 mm holes on the surface where you intend to install the light for screw placement.
- 2. Use the bolt to fasten the lamp, add the locking washer, and tighten the bolt securely.
- 3. Illustration of multiple mounting options: side bracket and bottom bracket.

Wiring connections & Functions

- 1. Wiring connections Black: Ground,-Red: Flood Beam,+
- 2. Wiring harness, 40A relay, 30A fuse.
