

 + DC 12-24V
 - Mass

 Alternating group
 Synchronisation & pattern selection

- Pattern selection: Connect the red wire to ground (white) for 1 second for the next pattern. Connect the red wire to ground (white) for 3-5 seconds to reset the pattern.
- Synchronisation: Connect all red wires together. Synchronisation is now complete.
- Alternating: Divide the warning lights into two groups. Connect the green wires of group 1 to +Vdc. Leave the green wires of group 2 unused. The two groups will flash alternately.
