

TRAILERT® GRAVELER SERIES

Iconic LED driving lights with duo-color position lights

The Graveler Series LED driving lights: an iconic round design with duo-colour position lights. You can choose between white or amber, perfectly matching the rest of your contour lights. At night, you can enjoy 12,000 lumen of light output, allowing you to illuminate even the darkest roads.

Discover the updated version of The Graveler from TRALERT®. This driving light is designed to excel in functionality and quality as well as appearance. One of the special features of this driving light is the position lights, which are available in white or amber. Furthermore, the light is equipped with the best materials, such as the impact-resistant polycarbonate lens and the robust housing with adjustable mounting bracket. The Graveler is available in black (WD-80120.1) and chrome (WD-80120C.1). A new feature is the placement of the logo: no longer large on the lens, but subtly on the mounting bracket.

The driving light has an IP value of IP69K and is therefore resistant to high-pressure spraying. The electronics are equipped with ETM, a thermal management system that regulates internal heat development. This system contributes to the long service life of the LED driving light. The EMC interference suppression (ECE-R10) is also of high value.

Certificates & Warranty

Included as standard

- 40 cm cable with Deutsch-connector
- 300 cm extension cable
- Manual & wiring diagram
- Adjustable mounting bracket
- Other mounting supplies

Sealed Deutsch-connector

WD-80120(C).1 product features

Connection	Deutsch-connector
Light image	Driving beam
Lumen	12.000 lumen
Voltage	9-36 V
LEDs	4x 20W & 4x 10W Cree LEDs
Wattage	80 watts
Power consumption	12V - 8.96A / 24V - 4.33A
IP value	IP69K
Dimensions	218 x 84 mm
Height including bracket	232 millimetres
Cable length	40 cm + 300 cm extension cable
Light range	352 lux at 25M / 1 lux at 469M
Light colour	White / amber
Lens material	Lexan Polycarbonate
Housing material	Cast aluminium (ADC12)
Housing shape	Round
Lens colour WD-80120.1	Black
Lens colour WD-80120C.1	Chromium
EMC interference suppression	ECE-R10
Certificates	ECE-R10, ECE-R112, ECE-R7
Warranty	2 years
Reference number	45
