

ONIX SERIES

TRALERT® PRODUCT LEAFLET

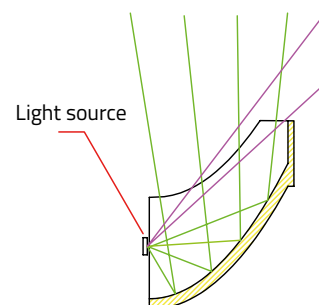

Onix Series

The LED worklights in the Onix series are described by many of our partners as the ideal all-round LED worklight. It is used in every area of the vehicle.

RFT lens technology

The work lights in the Onix series are equipped with RFT lens technology. This technology utilises Reflector Facing Technology (RFT), in which the LEDs are positioned so that they shine in the direction of the reflector and not directly outwards. This ensures significantly higher light output efficiency and better beam control. In addition, these robust LED worklights have a wide voltage range (9-36V), a dust and waterproof housing and a clear PMMA lens.

Three colours

The top version of the TRALERT® Onix series: the WF-6059WRA. This high-performance LED work light has the same efficient RFT lens technology as the rest of the series, but as a unique feature it also has a position light. This position light can be switched to three colours: red, white and amber. This makes the WF-6059RWA the ideal choice if you are not only looking for a robust lamp to illuminate your work area, but also want to look as stylish as possible.
